

## Front bumper strip - chrome

3V0 071 004

ŠKODA SUPERB (3V)

### Elegance | Style | Quality

With the ŠKODA Superb, the **boundaries between understated design and practical functionality** become blurred. The chrome strips for the front and rear bumpers lend the vehicle **a distinct air of luxury**, thereby achieving a look that is both fresh and attractive. The chrome strip for the front bumper is made from **durable ABS**, which retains its shape and colour over time. All parts of the strip are **shaped** to perfectly follow the contour of the front bumper edge, to which these parts are adhered. The strip has **passed ŠKODA's quality tests**. Even though it looks easy to adhere these, we recommend having this work carried out by an authorised ŠKODA AUTO service partner. Once the specified time has elapsed after adhering the strip for the front bumper, the vehicle can be washed in a car wash.

To adhere the strip to the front bumper, the following components must be ordered from the ŠKODA Genuine Accessories range:  
Terostat MS 9360 adhesive sealant / **5L0 071 780** (310 ml cartridge)

#### Associated products:

Rear bumper strip - chrome / 3V0 071 004A  
Stainless-steel foot pedal covers  
- for left-hand drive vehicles with manual transmission / 5E1 064 200
