Rear mats - polypropylene PP - 350 g/m², black polypropylene fiber

Colour: Black

Practicality | Style | Driving comfort

The textile mats for ŠKODA Superb are **practical**, simple and **stylish** at the same time. They contribute to **noise reduction** inside the car, thus increasing the acoustic comfort of the crew. They are shaped in order to fill the space under the passengers' feet optimally. Dirt and moisture have no chance of getting through onto the floor. The mats can be removed at any time to shake the dirt off. Their **quality and dense textile** is easy to maintain using common cleaning agents. The front mats with Superb lettering are made using polyamide fiber; the rear ones are made using polypropylene. They are **attached** to the floor of the car using fixtures so that they do not move even the slightest bit. The hardened skims on the mat are clipped directly onto the plastic pins in the floor.

Fitting time: 20 TU

Contents of the kit: 2 front mats with Superb lettering, 2 rear mats, installation manual

Fitting: The mats are attached by latching the hardened sheathes onto the floor pins

Maintenance: Standard soap-based cleaning agents suitable for carpet cleaning. Don't use abrasive cleaning agents or solvents.

Restrictions: Only for cars with left hand steering

Warranty: 24 months (does not apply regular wearing)

Weight: 2 kg
