

Plastic boot tray

3V5 061 162

ŠKODA Superb (3V3)

Material: PET

Colour: Black

Practicality | Transportation | Toughness and robustness

Do you indulge in **an active lifestyle**? Then you will surely appreciate the plastic tray that **protects the boot** of your ŠKODA Superb from moisture and dirt during fishing trips or other activities. The plastic boot tray is a **practical accessory** that not only increases the comfort when arranging your cargo, but also protects it from potential **damage**.

The boot tray can be inlaid with separating ALU partition to divide it into any number of parts and prevent the cargo from moving around the bottom of the tray by itself. The edges of the tray are about 150 mm high, preventing liquids from pouring off onto the boot floor. The plastic tray accurately copies the shape of the boot, fitting perfectly. It is loosely inserted and does not require any kind of special mounting. In order to empty it out or wash it with water or soap agents, the tray can be easily and quickly removed from the car without a risk of dirt falling into the luggage compartment. The tray is made of a **high-quality thermoplastic material**, very **tough and resistant** to chemical substances.

Fitting time: 20 TU

Dimensions: 1200 x 1050 x 150 mm

Contents of the kit: Plastic boot tray, installation manual

Fitting: Insert loosely into the boot

Maintenance: Standard soap-based cleaning agents. Don't use abrasive cleaning agents or solvents.

Restrictions: Only suitable for Superb limousine model version
