3V9 061 162

Superb Combi (3V5)

Material: TPU/ABS

Colour: Black

Dimensions:
990 mm x 1147 mm x 103 mm

Practical addition | Protection | Strength and durability

Does your active lifestyle mean that you're always carrying things around? If so, the **plastic dish** from the ŠKODA Original Accessories range is the perfect choice for you and will prove extremely useful when going out to play sport or heading off on a fishing trip, for example. It **protects the luggage compartment** from **moisture and dirt**, and is therefore a **practical addition** to any vehicle. Not only does it help with easily stowing items, it also protects them against damage. **Aluminium dividers** can be inserted into the dish, separating the storage space into any number of smaller compartments. You can therefore prevent transported items sliding around the luggage compartment. The raised edging on the dish stops liquids from spilling into the luggage space. The plastic dish fits perfectly into the luggage compartment, is lightweight and does not need to be secured in the luggage compartment. This means that it can be quickly and easily taken out, without spilling any dirt into the luggage compartment. The dirt can then be tapped off or the dish cleaned, if required. The dish is manufactured from **high-quality thermoplastic**, and is extremely **durable** as well as **resistant** to chemicals.

Associated products:

Aluminium divider / 3T0 017 254

Fitting time: 20 TU

Set contents:
Plastic boot dish,
fitting instructions.
