

Netting system, grey

565 065 110C

ŠKODA KODIAQ

Material: Elastic netting and plastic

Practical accessory | Transport | Tests

The netting system from the ŠKODA Original Accessories range is both a **practical** and **attractive addition** to the luggage compartment. It is designed to **secure transported items or luggage** and prevents them from sliding around when the vehicle is on the move, thereby also preventing any damage. Securing larger items using a floor net also increases the safety of vehicle passengers, and prevents the vehicle's centre of gravity from shifting when manoeuvring sharply. The nets are fitted by hooking them onto the lashing eyes and hooks in the luggage compartment. The elastic material has undergone **strength tests** and is designed to hold items weighing up to 1.5 kg. To avoid causing damage to the netting material, do not store items with sharp edges or hook-and-loop fasteners in the net.

Associated products:

Smart Holder – hook / 3V0 061 126

Universal fixing element / 6V0 061 104

Color: Grey

Installation time: 20 TU

Set contents:

Horizontal floor net, vertical side net, fitting instructions.
