SIMPLY CLEVER

20" Xtreme brushed alloy wheel in silver design

565 071 490D 8Z8

ŠKODA KODIAQ (NS)

Original design | Rigorous testing | Quality

The alloy wheels from the ŠKODA Genuine Accessories range are available in numerous designs and a wide variety of colour schemes for each vehicle model, ensuring that you can emphasise the individuality of your car, making it truly one of a kind. The originality of the design of the alloy wheels embodies a successful **combination of quality, functionality and aesthetics**. The alloy wheels have undergone rigorous testing, during which the stresses at every single point on the wheel are tested. This ensures that they are of **exceptional quality** and are roadworthy. The alloy wheels are designed to have a **good weight distribution**. This has a positive effect on reducing the centrifugal force. This results in improved acceleration and deceleration dynamics. Due to the reduction in the unsprung mass of the vehicle, the wheels **improve the vehicle's handling**. These feature an integral design and are produced by casting aluminium alloy, after which an extremely hard, heat-resistant coating is applied. Any dirt sticking to the alloy wheels can be easily removed using a special cleaning agent from the ŠKODA Genuine Accessories range. **Always check the documentation to see whether the wheels and tyres can be used on your vehicle.** Accessorise your vehicle to perfection with the Xtreme brushed alloy wheels in silver design, which add a sporty touch to any vehicle exterior.

Associated products:

Safety bolt set / 000 071 597C

Bolt covers / 1Z0 071 215*

Decorative valve caps / 000 071 215C
