

CRATER alloy wheel

565 071 499H 8Z8

ŠKODA KODIAQ

Material: Alloy

Original design | Rigorous testing | Superior durability | Quality

The **CRATER wheels** from the ŠKODA Original Accessories range are **exactly the same as the Gemini wheels fitted as standard**.

They have undergone rigorous testing to guarantee that they are both reliable and of absolutely top quality. The alloy wheels are designed to have a **good weight distribution**. This has a positive effect on reducing the centrifugal force. This results in improved acceleration and deceleration dynamics. Due to the reduction in the unsprung mass of the vehicle, the wheels **improve the vehicle's handling**. These feature an integral design and are produced by casting aluminium alloy, after which an extremely hard, heat-resistant coating is applied. Check the documentation to see whether the wheels can be used on your vehicle. Any dirt sticking to the alloy wheels can be easily removed using a special cleaning agent from the ŠKODA Original Accessories range.

Associated products:

Safety bolt set / 000 071 597C

Bolt covers / 1Z0 071 215*

Decorative valve caps / 000 071 215C

Cover for the complete set of wheels / 000 073 900B

Color:

Silver, surface ground

Installation time: 40 TU

Set contents:

Alloy wheel, ŠKODA wheel centre cap, fitting instructions.

Wheel dimensions:

7J x 19" ET 43

Tyres:

235/50 R19

Maintenance:

Wheel rim cleaning gel / 000 096 304C. Do not use abrasive cleaning agents, solvents or scourers.

Limitations:

Can not be combined with snow chains.

Guarantee: 24 months.

Weight: 13,5 kg
