

Double-sided boot mat

57A 061 163

ŠKODA KAROQ (NU)

Color: Black

Practical accessory | Variability of applications | Protection | Resistance

Although the ŠKODA KAROQ's generously sized luggage calls for transportation of neat, well-organised luggage, sometimes it is also necessary to transport soiled or dirty objects. With this double-sided mat in place, you will **protect the boot** from any kind of soiling. The uniqueness of this universal mat lies in **two different surfaces used on its two sides**. While the top side features a **high-quality textile fabric** designed for the storage and fastening of clean objects and its primary function is therefore aesthetic, the bottom side is **anti-slip plastic** to prevent dirt such as mud, water, snow etc. from getting to the vehicle's floor. Having decided **which of the two sides is better in the situation concerned**, the user simply lays the mat accordingly. The mat **does not need to be fastened**, as it perfectly copies the boot shape, and can be taken out easily and cleaned using ordinary detergents. Stringent material-strain (lab) tests and long-term road tests have proven the **mat's high resistance to mechanical strain in both dry and wet conditions**. Enjoy your life in full, with no limits, and load your vehicle with whatever you need to transport! **Combining the benefits of two different carpets**, this multi-function double-sided mat will help you keep your interior clean and tidy while perfectly protecting the luggage compartment against undesired impacts - no matter what you transport.
