

Alloy wheel TURINI

5E0 071 498B 8Z8

ŠKODA Octavia (5E)

Material: Light metal alloy

Colour: Silver metallic

Decent Sports Feel | Rigorous Tests | Robustness | Quality

The overall appearance of your car is underlined by the **large wheels** from the ŠKODA Genuine Accessories portfolio. The Turini fifteen-spoke, eighteen-inch wheel is one of these. These wheels have passed **rigorous tests** according to strict standards of ŠKODA AUTO to test their resistance to corrosion, climatic influences and driving strain. Due to the elaborate testing control system, **every part of the wheel** is properly tested in terms of stress. The **Turini** wheels are made of an alloy of aluminium and several other light metals. They are cast as a solid piece and coated with a layer of heat-resistant protective finish. The Silver Metallic colour is very decent and universally usable for a wide variety of bodywork colour tones. Their suitability for a specific car needs to be confirmed in your main vehicle registration card. Not all variants are legally suitable to fit such large wheels. The Turini wheels should be cleaned exclusively using a special gel offered by the ŠKODA Genuine Accessories portfolio. Do not use abrasive cleaning agents, solvents or steel wool.

Wheel dimensions: 7,5J x 18", ET 51

Tyres: 225/40 R18

Specified for combination with snow chains: No

Fitting time: 40 TU
