

Front mud flaps

5E0 075 111

ŠKODA OCTAVIA III

Material: EVA + polyethylene

Utility | Protection | Resistance | Quality

The front mud flaps are another of the **practical accessories** from the ŠKODA Original Accessories range that increase the utility of the vehicle. They protect the lower areas of the vehicle body from dirt and damage caused by stones and debris striking them. Mud flaps are useful especially in winter, when the corrosive salt that is spread on the roads generally sticks to the mud flaps rather than to the vehicle body. Their geometry is tailored perfectly to that of the wheel arches to avoid incurring any aerodynamic losses. The mud flaps are manufactured from high-quality, flexible material that retains its shape between -50 °C and $+50\text{ °C}$. They are resistant to chemicals (road salt, oil and fuel) and can also withstand UV radiation. And because they are easy to attach to the wheel arches, there is no need for modifications to the bodywork, which means that the corrosion protection remains intact.

Associated products:

Rear mud flaps / 5E0 075 101 (to CW 05/217) /
5E0 075 101A (from CW 06/17)
Plastic boot dish / 5E5 061 162 / 5E9 061 162

Color: Black

Installation time: 60 TU

Set contents:

Front mud flaps (1+1), fastening material, fitting instructions.

Installation position:

To the wheel arches using fastening material (included).

Maintenance:

Maintenance-free – the vehicle can be washed in a car wash, using conventional cleaning agents if possible.

Guarantee: 24 months.

Weight: 0,3 kg
