SPACEBACK (NH1)**

Original design | Rigorous testing | Superior durability | Quality

The originality of the design and the effortless elegance of the alloy wheels from the ŠKODA Genuine Accessories range embody a successful **combination of quality, functionality and aesthetics**. These wheels are subjected to the same rigorous testing as standard wheels. Our thorough testing system means that the stresses at every single point on the wheel are tested. This ensures that they are of **high quality** and are roadworthy. The alloy wheels are designed to have a **good weight distribution**. This has a positive effect on reducing the centrifugal force. This results in improved acceleration and deceleration dynamics. Due to the reduction in the unsprung mass of the vehicle, the wheels **improve the vehicle's handling**. These feature an integral design and are produced by casting aluminium alloy, after which an extremely hard, heat-resistant coating is applied. Check the documentation to see whether the wheels can be used on your vehicle. Any dirt sticking to the alloy wheels can be easily removed using a special cleaning agent from the ŠKODA Genuine Accessories range.

Associated products:

Safety bolt set / 000 071 597C

Bolt covers / 1Z0 071 215*

Decorative valve caps / 000 071 215C

Cover for the complete set of wheels / 000 073 900B

Material: Lightweight alloy

Installation time: 40 TUs

Wheel dimensions: 7,0J x 17" ET 46

Tyres:

- 215/40 R17 - cannot be fitted with snow chains.

Set contents:

Alloy wheel, ŠKODA wheel centre cap, fitting instructions.

Maintenance:

Wheel rim cleaner, gel / 000 096 304C.
Do not use abrasive cleaning agents, solvents or scourers.

Guarantee: 24 months.

Weight: 10.5 kg
